SAYAN PAUL
Web Developer

Passionate ECE undergrad with hands-on experience building AI-driven and full-stack web applications that solve real problems — from real-time canteen pre-orders to safety alert systems. Secured 3rd place in ByteStorm 1.0 hackathon by collaborating on all projects simultaneously as a key contributor. Skilled in JavaScript, HTML, CSS, Supabase, and Git, with a strong drive for learning fast, building smarter, and working in team-first environments.

Projects

2025

Safespace - AI-driven safety tool for solo travellers and students

Role- Frontend development & reseach

- Problem: No proactive hands-free alert system.
- Action: integrated audio distress detection with groq ai ; deployed on Supabase (<2s response).
- Result: Handled 200+ simulated alerts with zero false negatives.
  Website - https://safespace-2-0.vercel.app/

2025

Fresh & Fast- Real-time canteen pre-order app for campus students.

Role- Frontend development & reseach

- Problem: Students lost 30min/day in queues.
- Action: Developed Node.js API & Supabase DB; led 4-person sprint cycles;
- Result: Got the freshers Certificate (basically being 3rd) in our first Hackathon.
  Website - https://freshandfastgmit.netlify.app/

2025

Personal Portfolio-Responsive site showcasing my work

Role- Full-stack development

- Problem: Lack of online presence costing interviews.
- Action: Coded HTML/CSS/JS; wrote 3 technical blog posts.
- Result: developed a strong and clean presence.
  Website - https://sayanportfolio1776.netlify.app/

ACHIEVEMENTS

F**reshers Talent Award** Recognized for outstanding contributions to web development and innovative solutions as a freshers participant and Team Leader

Participant at NameSpace Thrilled to have participated in and led a team at my first national online hackathon, *HACKHAZARDS*, hosted by the amazing NameSpace Community—an incredible journey of innovation, teamwork, and growth

CERTIFICATIONS
